Q2 ION

Ultra-compact Spark Emission Metals Analyzer

Q2 ION is a true multi-matrix system for comprehensive incoming material inspection and quality assurance of metal alloys

- Capable of analyzing all alloying elements in ferrous, aluminium and copper alloys
- Robust & light (~ 42 lbs / ~ 19 kg)
- Simplified operation, minimized maintenance and short analysis times
- Affordable price and low operational costs

Q2 ION the new ultra-light analyzer for metal analysis!
